DOING THINGS DIFFERENTLY

We are COBRA® Golf.

You may know us as the brand that's "Doing Things Differently™." But, differently only matters when it's better. We like to have fun, yes,...but this company was born from a fundamental belief that there is always a better way waiting to be discovered, there is always a NEXT waiting to be revealed.

Bold talk, sure, but we believe that bold thought requires bolder action: saying it is easy, putting in the work, doing more than what's expected, and pushing further still is the only way that true innovation happens. That is where different leads to better.

Different also gives way to "firsts": Whether its the first company to invent the utility club, to build clubs with graphite shafts, to mass-produce ONE-length irons or clubs with Smart technology. We lead our industry in sourcing materials, new shapes and new processes, all in the name of better.

At COBRA®, our approach will always be different -
BUT, WAIT TILL YOU SEE WHAT DIFFERENT DOES NEXT.

WE ARE COBRA® GOLF AND WE ARE NEXT ON THE TEE.

Here's to Doing Things Differently™.

RAD SPEED DRIVER TECHNOLOGY

RADIAL WEIGHTING

RADIAL WEIGHTING is the strategic placement of weight relative to the CG to optimize speed, forgiveness, and flight direction. By increasing the distance between the front and back weights, we've created a radical combination of ultra low spin, and extreme speed and forgiveness in one driver. The KING RADSPEED™.

+ EXTREME FRONT WEIGHTING

The RADSPEED™ driver frame features 28g positioned as forward as possible (16g of fixed weight and a 12g adjustable weight) to deliver ultra low spin and our fastest ball speeds. An additional 10 grams of weight positioned in the back (8g of fixed weight and a 2g adjustable weight) creates the perfect balance of front and back weighting for RAD speed & forgiveness.

+ EXTREME BACK WEIGHTING

The RADSPEED™ XB driver features 20g positioned in the back (14g of fixed weight and a 6g interchangeable weight) to create our most forgiving RADSPEED™ model. An additional 8g of fixed weight is positioned in the front to lower spin for the longest and fastest ball flights.

+ THIN-PLY CARBON CROWN

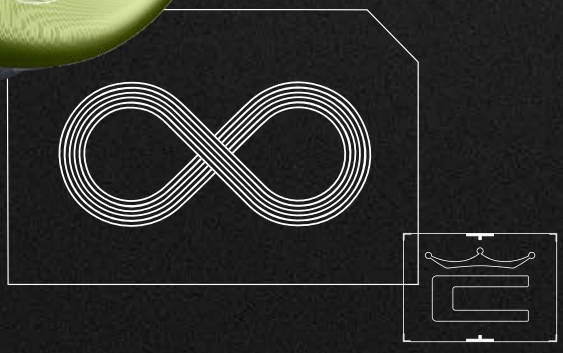
The Carbon Wrap Crown system features a new carbon fiber material that is 30% thinner which creates another 6 grams of discretionary weight that can be repositioned to optimize performance.

× LIGHTER T-BAR CHASSIS

A refined T-Bar Speed Chassis design is 7 grams lighter, giving us even more discretionary weight to position mass within the frame to optimize performance.

+ CNC INFINITY FACE

An infinity edge face design expands the milled area by 95% to increase the zone of maximum ball speed.



RAD SPEED DRIVERS

+ RADSPEED™ DRIVER

The RADSPEED™ Driver features a compact shape (460cc) and forward biased RADIAL WEIGHTING with front to back adjustability to deliver the fastest ball speeds, lowest spin, and the most workability.

FRONT RADIAL WEIGHTING

COLORS

BLACK / TURBO YELLOW

RADSPEED DRIVERS

+ RADSPEED™ XB DRIVER

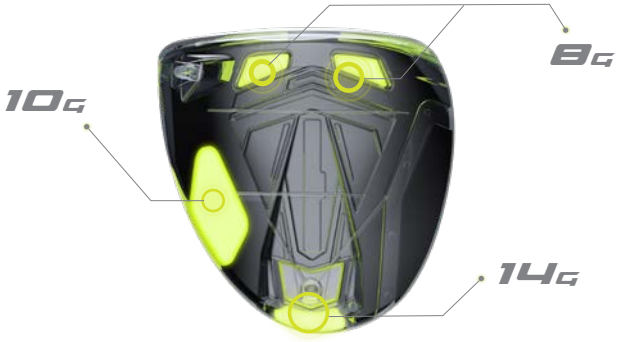
The RADSPEED™ XB (Xtreme Back) Driver features an oversized shape (460cc) and back biased RADIAL WEIGHTING to deliver the fastest and straightest ball flight, low spin, and the most stability and forgiveness.

BACK RADIAL WEIGHTING

+ RADSPEED™ XD DRIVER

The RADSPEED™ XD (Xtreme Draw) Driver features an oversized shape (460cc) and heel biased internal RADIAL WEIGHTING to deliver the fastest and straightest ball flight with maximum slice-fighting capability.

HEEL RADIAL WEIGHTING



RAD SPEED DRIVER

The RADSPEED™ Driver features a traditional shape (460cc) and forward-biased RADIAL WEIGHTING with front to back adjustability to deliver the fastest ball speeds, lowest spin, and the most workability of the three models.

FORWARD-BIASED RADIAL WEIGHTING

The RADSPEED™ driver frame features 28g positioned as forward as possible (16g of fixed weight and a 12g adjustable weight) to deliver ultra low spin and our fastest ball speeds. An additional 10 grams of weight positioned in the back (8g of fixed weight and a 2g adjustable weight) creates the perfect balance of front and back weighting for RAD speed & forgiveness.

THIN-PLY CARBON WRAP CROWN

The Carbon Wrap Crown system features a new carbon fiber material that is 30% thinner which creates another 6 grams of discretionary weight that can be repositioned to optimize performance.

T-BAR CHASSIS

A refined T-Bar Speed Chassis design is 7 grams lighter, giving us even more discretionary weight to position more mass forward within the frame to decrease spin and increase ball speed.

CNC MILLED INFINITY FACE

An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

cobra CONNECT

This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos Caddie app to receive a FREE 90-day trial that will track your on-course performance and provides in-depth strokes gained analysis. See app for details.

RADSPEED XD DRIVER

The RADSPEED™ XD Driver features an oversized shape (460cc) and heel biased internal RADIAL WEIGHTING to deliver the fastest and straightest ball flight with maximum slice-fighting capability.

HEEL-BIASED RADIAL WEIGHTING

The RADSPEED™ XD driver features a 10g weight positioned in the heel to enable easier face closure for straighter, more draw biased drives. Another 14g is positioned in the back for extreme forgiveness while 8g is positioned forward to increase speed. This trio of weight positions together create our fastest and most forgiving draw biased driver.

THIN-PLY CARBON WRAP CROWN

The Carbon Wrap Crown system features a new carbon fiber material that is 30% thinner which creates another 6 grams of discretionary weight that can be repositioned to optimize performance.

T-BAR CHASSIS

A refined T-Bar Speed Chassis design is 7 grams lighter, giving us even more discretionary weight to position mass more heelward within the frame to create draw bias.

CNC MILLED INFINITY FACE

An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

F-MAX DRIVER

Our lightest driver is designed to help golfers with moderate swing speeds swing faster, easier.

LIGHTWEIGHT DESIGN
Our lightest driver is engineered using a lighter headweight, shaft and grip that generate more club speed and distance for golfers with moderate swing speeds.

CARBON CROWN
Using a carbon fiber crown saves 10 grams of discretionary weight to create a lighter head without sacrificing forgiveness.

BACK/HEEL WEIGHTING
Heel-biased weighting keeps drives in control and down the fairway more consistently.

OFFSET DESIGN
An offset hosel provides correction for rightward tendencies, allowing golfers to find more fairways effortlessly.

RAD SPEED FWY/HYB TECHNOLOGY

RADIAL WEIGHTING

Radial Weighting is the strategic placement of weight relative to the CG to optimize speed, forgiveness, and flight direction from the fairway or off the tee.

+ EXTREME FRONT WEIGHTING

16 grams (in the RADSPEED™ model) are positioned as forward as possible to deliver a lower CG for ultra low spin, and our fastest ball speeds.

CNC INFINITY FACE*

An infinity edge face design expands the milled area by 95% to increase the zone of maximum ball speed.

THIN-PLY CARBON CROWN*

A carbon crown features a new carbon fiber material that is 30% thinner which creates 4 grams of discretionary weight for engineers to strategically position internally to optimize performance.

HOLLOW SPLIT RAILS

Hollow rails in the front create 70% more flex on the sole right behind the face for higher launch and faster ball speed.

*Fairway only

RAD SPEED FAIRWAYS

+ FAIRWAY

The RADSPEED™ fairway features a traditional shape with a balance of front & back RADIAL WEIGHTING (16g front + 7g back) to deliver low spin, with high launching trajectories for maximum distance off the tee and off the turf.

FRONT / BACK RADIAL WEIGHTING

+ BIG TOUR & TOUR FAIRWAYS

The RADSPEED™ Big Tour 3-wood features a slightly deeper face, and front-biased (23g total) RADIAL WEIGHTING for the fastest ball speeds with low launch and spin. The Tour 5-wood features a tour compact profile for maximum workability.

FRONT RADIAL WEIGHTING

HEEL RADIAL WEIGHTING

+ DRAW FAIRWAY

The RADSPEED™ Draw fairway features heel-biased RADIAL WEIGHTING (16g internal) and a 7g back weight for medium spin, and maximum slice correction power for straighter ball flights.

RAD SPEED HYBRIDS

+ HYBRID

The RADSPEED™ Hybrid features front-biased internal RADIAL WEIGHTING (two 6g internal front weights) and an external back weight (7g) to deliver low spin with high launch and forgiveness.

+ ONE LENGTH HYBRID

The RADSPEED™ ONE Length Hybrid is designed for maximum consistency and accuracy in a shorter 37.5" setup. Can be used as a standalone hybrid or to complement the ONE Length irons in a combo set.

RAD SPEED FAIRWAY

The RADSPEED™ fairway features a traditional shape and front-biased RADIAL WEIGHTING to deliver low spin, with high launching trajectories for greater stopping power into greens.

FRONT-BIASED RAD WEIGHTING
Two 8 gram internal front RAD weights (16g total) and a 7g back weight create a balance of front and back weighting that delivers ultra low spin with high launch and forgiveness.

HOLLOW SPLIT RAILS
Hollow rails in the front create 70% more flex from on the sole right behind the face for higher launch and more speed.

CNC MILLED INFINITY FACE
An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

THIN-PLY CARBON CROWN
A new carbon fiber material is 30% thinner and 6 grams lighter allowing for more flexibility to move weight forward to lower spin and increase speed.

cobra CONNECT
This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos Caddie app to receive a FREE 90-day trial that will track your on-course performance and provides in-depth strokes gained analysis. See app for details.

RADSPEED BIG TOUR FAIRWAY

The RADSPEED™ Big Tour 3-wood features a slightly slightly deeper face, and front-biased internal and external RADIAL WEIGHTING for the lowest CG, lowest spin and fastest ball speeds.

FRONT-BIASED RAD WEIGHTING
16 grams of internal front RAD weighting plus a 7g front weight (23g total) delivers the lowest CG and ultra low spin for the fastest ball speed, and a lower, penetrating trajectory.

HOLLOW SPLIT RAILS
Hollow rails in the front create 70% more flex on the sole right behind the face for higher launch and more speed.

CNC MILLED FACE
CNC milling is up to 5 times more precise than hand polishing and allows us to produce the most consistent face thickness and faster ball speed.

THIN-PLY CARBON CROWN
A new carbon fiber material is 30% thinner and 6 grams lighter allowing for more flexibility to move weight forward to lower spin and increase speed.

F-MAX FAIRWAY

Our lightest fairway is designed to help golfers with moderate swing speeds swing faster, easier.

LIGHTWEIGHT DESIGN
A lighter overall club weight generates more club speed and distance for golfers with moderate swing speeds.

LIGHTER SHAFT
A 5 gram lighter shaft allows you to swing faster around your body using the same smooth tempo.

CARBON CROWN
Using a carbon fiber crown saves 10 grams of discretionary weight to create a lighter head without sacrificing forgiveness.

BACK/HEEL WEIGHTING
Heel-biased weighting keeps shots in control and down the fairway more consistently.

OFFSET DESIGN
An offset hosel provides maximum slice correcting power, allowing you to find more fairways and greens.

RAD SPEED HYBRID

The RADSPEED™ Hybrid features front-biased internal RADIAL WEIGHTING and an external back weight to deliver low spin, high launch and forgiveness.

FRONT-BIASED RAD WEIGHTING
Two 6g internal front RAD weights (12g total) and a 7g back weight combine to deliver ultra low spin with high launch and forgiveness.

HOLLOW SPLIT RAILS
Hollow rails in the front create 70% more flex on the sole right behind the face for higher launch and more speed.

FORGED FACE
A forged insert is thinner and more flexible to create faster ball speeds and higher launch for greater stopping power into greens.

BAFFLER RAILS
Two Baffler® sole rails prevent digging and allow the club to glide effortlessly out of tight lies, thick rough, and even bunkers.

cobra CONNECT

Two 6g internal front RAD weights (12g total) and a 7g back weight combine to deliver ultra low spin with high launch and forgiveness.

HOLLOW SPLIT RAILS
Hollow rails in the front create 70% more flex on the sole right behind the face for higher launch and more speed.

FORGED FACE
A forged insert is thinner and more flexible to create faster ball speeds and higher launch for greater stopping power into greens.

BAFFLER RAILS
Two Baffler® sole rails prevent digging and allow the club to glide effortlessly out of tight lies, thick rough, and even bunkers.

cobra CONNECT
This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos Caddie app to receive a FREE 90-day trial that will track your on-course performance and provides in-depth strokes gained analysis. See app for details.

F-MAX HYBRID

Our lightest hybrid is designed to help golfers with moderate swing speeds swing faster, easier.

LIGHTWEIGHT DESIGN
A lighter overall club weight generates more club speed and distance for golfers with moderate swing speeds.

LIGHTER SHAFT
A 5 gram lighter shaft allows you to swing faster around your body using the same smooth tempo.

BACK/HEEL WEIGHTING
Heel-biased weighting keeps shots in control and straight down the target line more consistently.

SHALLOW PROFILE
A shallow face profile lowers the CG for higher ball flights that land softly into greens.

OFFSET DESIGN
An offset hosel provides correction for rightward tendencies, allowing golfers to find more fairways and greens effortlessly.

RAD SPEED

IRON TECHNOLOGY

RADIAL WEIGHTING

Radial Weighting is the strategic placement of weight relative to the CG to optimize speed and forgiveness. The further away the mass is positioned from the CG, the better the performance.

EXTREME HEEL & TOE WEIGHTING

10g and 3g of mass is positioned on the toe and heel extremities to create the best combination of speed, low spin and stability for optimized performance.

TUNED RAD WEIGHTING

A 10g weight positioned low and in the toe area centers the CG and adds stability for more distance and forgiveness on off-center hits.

FORGED PWRSHELL FACE

A forged face insert is made of a thin 17-4 stainless steel, and is designed to increase flex in and around the Sweet Spot for faster ball speed and higher launch.

3D PRINTED MEDALLION

Cobra has pioneered the use of 3D printing in golf manufacturing. It offers unlimited complexity in design, allowing us to create an intricate lattice medallion structure that saves weight while fine-tuning feel.

RAD SPEED IRONS

The RADSPEED™ irons represent a significant leap forward in golf innovation. A breakthrough in weighting technology is combined with the first application of 3D printing in golf club design, setting the bar for performance and technology higher than ever before.

EXTREME HEEL AND TOE WEIGHTING
10g and 3g of mass is positioned on the toe and heel extremities to create the best combination of speed, low spin and stability for optimized performance.

TUNED RAD WEIGHTING
A 10g weight positioned low and in the toe area centers the CG and adds stability for more distance and forgiveness on off-center hits.

FORGED PWRSHELL FACE
A forged face insert is made of a thin 17-4 stainless steel, and is designed to increase flex both on the face and the sole for faster ball speed and higher launch.

3D PRINTED MEDALLION
3D printing offers unlimited complexity in design, allowing us to produce an intricate lattice medallion structure that saves weight and fine-tunes feel.

FORGED TEC IRONS

Classic looks fuse with modern technology to unleash a blend of distance and playability in a compact muscle back shape preferred by better players.

FOAM INFUSED CORE
A hollow cavity is infused with foam microspheres that fine-tune acoustics and create a softer feel.

PWRSHELL FACE
For the first time in a players iron, a forged face insert creates a larger sweet zone for higher launch and faster ball speed in a compact shape.

TUNGSTEN WEIGHTING
Tungsten toe weighting centers the CG behind the hitting zone to maximize distance and precision, even on off-center hits.

cobra CONNECT

FORGED TEC ONE LENGTH IRONS

Engineered to deliver distance, consistency and playability in a compact muscle back shape preferred by better players.

CONSISTENT SET UP & SWING
Every club at 7-iron length promotes one repeatable setup and swing for more consistency club to club.

MATCHING HEAD WEIGHTS
Matching 7-iron head weights and swing weights in every iron create consistent feel through the set.

OPTIMIZED LIE ANGLES
Fine tuned lie angles optimize trajectories in the long irons, mid-irons and wedges.

PROGRESSIVE SHAFT WEIGHTS
Lighter long iron shafts encourage easy launch while heavier wedge shafts promote more control into and around the green.

KING® TOUR IRONS WITH MIM TECHNOLOGY

When forging or casting couldn't deliver the soft feel we sought after, we introduced a new process. The new KING Tour irons are the first irons created using Metal Injection Molding (MIM) Technology, the most precise way to make a precision iron.

MIM CONSTRUCTION
The Metal Injection Molding (MIM) process delivers the most precise shapes and exceptionally soft feel.

TUNGSTEN WEIGHTING
A tungsten toe weight centers the CG behind the hitting zone to give you the purest, most precise shots with added stability to keep the ball on-target.

TPU INSERT
A thermoplastic polyurethane (TPU) insert positioned behind the hitting zone damps vibrations for a buttery soft feel at impact.

cobra CONNECT

KING® RF FORGED MB COPPER IRONS*

The KING RF Forged MB irons feature a signature shape that is designed by Rickie Fowler and Cobra Golf. A 5-step forging process produces the soft feel better players desire, while the sharp edges, thin topline and little to no offset are designed specifically to suit Rickie's eye. The "RF" logo is included for a special touch as Rickie's stamp of approval.

5-STEP FORGING
Each iron is forged 5 times from a block of 1025 carbon steel to deliver the softest feel desired by the best players.

TUNGSTEN TOE WEIGHTING
A Tungsten weight is positioned out on the toe to center the CG behind the sweet spot for the purest and most precise shots with added stability.

COPPER FINISH
A rich copper finish was hand selected by Rickie Fowler as a finishing touch to make these irons truly one of a kind.

COBRA CONNECT™
This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos caddie app to receive a FREE 90-day trial and start tracking your on-course performance and strokes gained.

F-MAX IRONS

Our lightest irons are designed to help golfers with moderate swing speeds swing faster, easier.

LIGHTWEIGHT DESIGN
A lighter overall club weight generates more club speed and distance for golfers with moderate swing speeds.

LIGHTER SHAFT
A 5 gram lighter shaft allows you to swing faster around your body using the same smooth tempo.

LOW PROFILE/DEEP UNDERCUT
A low profile, cavity back design with greater lofts will help golfers launch it higher and longer, effortlessly.

STRATEGIC WEIGHTING
Heel-biased weighting keeps shots in control and straight down the target line more consistently for more GIR's & birdie opportunities.

PROGRESSIVE CONSTRUCTION
Progressive hosel lengths and progressive offset through the set improve launch and accuracy in the long irons, mid irons and wedges.

T-RAIL HYBRID IRONS

The next generation Cobra T-Rail hybrid irons feature all new Baffler Hollow Split Rails to deliver enhanced speed, launch, and distance to help you experience the easiest golf of your life.

HOLLOW CONSTRUCTION
A hollow design through the set delivers effortless launch and distance in the long irons to the wedges.

BAFFLER HOLLOW SPLIT RAILS
Hollow rails in the front create up to 70% more flex on the sole right behind the face to deliver high launch and more speed while maintaining excellent turf interaction from the signature Baffler rail design.

FORGED E9 FACE
A high strength steel face is designed with variable thickness E9 Technology to ensure no distance is left behind, even on off-center hits.

5 HYBRID IN THE SET
A 5-hybrid launches higher and is more forgiving than a 5-iron, making longer approach shots not just easier, but much more consistent.

KING® UTILITY IRONS

Classic looks fuse with modern technology in a utility iron that blends distance and playability in a muscle back shape preferred by better players.

PWRSHELL FACE
A forged face insert creates a larger sweet zone for higher launch and increased speed for maximum distance

HOLLOW CONSTRUCTION
A classic, muscle back shape conceals an unassuming hollow core that delivers low CG and controlled distance for maximum playability.

TUNGSTEN WEIGHTING
Tungsten toe weighting centers the CG behind the hitting zone to maximize distance and precision, even on off-center hits.

MYFLY8 TECHNOLOGY
Eight easily adjustable loft settings help you manage trajectory and fine-tune launch to maximize distance.

MIM 2024
56°
KING
MIM
cobra

KING® MIM CHROME

The KING MIM Wedge is fully Metal Injection Molded (MIM) to create the most precise shaping and exceptionally soft feel in a specialty wedge. Each loft is available in select grinds.

MIM (METAL INJECTION MOLDED) 304 SS
MIM manufacturing delivers more consistent thickness and shaping controls than castings and a tighter grain structure that delivers softer feel.

3 GRINDS: VERSATILE, CLASSIC, WIDELOW
The "versatile" grind features toe, heel and trailing edge relief, the "classic" grind features a progressive sole width from heel to toe, and the "widelow" grind features a wide sole with reduced bounce.

CNC MILLED FACE & GROOVES
CNC milling is used to create more precise face and groove structures for improved spin and trajectory control.

PROGRESSIVE SPIN TECHNOLOGY
The stronger lofts (50-54) feature narrower, tighter grooves and the weaker lofts (56-60) feature wide, shallower grooves for consistent trajectories between lofts.

cobra CONNECT
This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos Caddie app to receive a FREE 90-day trial that will track your on-course performance and provides in-depth strokes gained analysis. See app for details.

WOMEN'S

RADX SPEED — WOMEN'S DRIVER

The RADSPEED™ XB (XTREME Back) Women's Driver features an oversized shape (460cc) and back-biased RADIAL WEIGHTING to deliver the longest and most forgiving ball flight with low spin.

BACK-BIASED RADIAL WEIGHTING
The RADSPEED™ XB driver features 20g positioned in the back (14g of fixed weight and a 6g interchangeable weight) to create our most forgiving RADSPEED™ model. An additional 8g of fixed weight is positioned in the front to lower spin for the longest and fastest ball flights.

THIN-PLY CARBON WRAP CROWN
The Carbon Wrap Crown system features a new carbon fiber material that is 30% thinner which creates another 6 grams of discretionary weight that can be repositioned to optimize performance.

T-BAR CHASSIS
A refined T-Bar Speed Chassis design is 7 grams lighter, giving us even more discretionary weight to position more mass low and back within the frame to optimize forgiveness.

CNC MILLED INFINITY FACE
An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

ARCCOS CADDIE

cobra CONNECT

RADSPEED XD — WOMEN'S DRIVER

The RADSPEED™ XD Driver features an oversized shape (460cc) and heel biased internal RADIAL WEIGHTING to deliver the fastest and straightest ball flight with maximum slice-fighting capability.

HEEL-BIASED RADIAL WEIGHTING

The RADSPEED™ XD driver features a 10g weight positioned in the heel to enable easier face closure for straighter, more draw biased drives. Another 14g is positioned in the back for extreme forgiveness while 8g is positioned forward to increase speed. This trio of weight positions together create our fastest and most forgiving draw biased driver.

THIN-PLY CARBON WRAP CROWN

The Carbon Wrap Crown system features a new carbon fiber material that is 30% thinner which creates another 6 grams of discretionary weight that can be repositioned to optimize performance.

T-BAR CHASSIS

A refined T-Bar Speed Chassis design is 7 grams lighter, giving us even more discretionary weight to position mass more heelward within the frame to create draw bias.

CNC MILLED INFINITY FACE

An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

F-MAX WOMEN'S DRIVER

Our lightest driver is designed to help golfers with moderate swing speeds swing faster, easier.

LIGHTWEIGHT DESIGN
A lighter overall club weight generates more club speed and distance for golfers with moderate swing speeds.

CARBON CROWN
Using a carbon fiber crown saves 10 grams of discretionary weight to create a lighter head without sacrificing forgiveness.

BACK/HEEL WEIGHTING
Heel-biased weighting keeps drives in control and down the fairway more consistently.

OFFSET DESIGN
An offset hosel provides correction for rightward tendencies, allowing golfers to find more fairways effortlessly.

€ 349,00

RAD SPEED WOMEN'S FAIRWAY

The RADSPEED™ women's fairway features a traditional shape and front-biased RADIAL WEIGHTING to deliver low spin, with high launching trajectories for greater stopping power into greens.

FRONT-BIASED RAD WEIGHTING
Two 8 gram internal front RAD weights (16g total) and a 7g back weight create a balance of front and back weighting that delivers ultra low spin with high launch and forgiveness.

HOLLOW SPLIT RAILS
Hollow rails in the front create 70% more flex from heel to toe for higher launch and more speed.

CNC MILLED INFINITY FACE
An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

THIN-PLY CARBON CROWN
A new carbon fiber material is 30% thinner and 4 grams lighter allowing for more flexibility to move weight forward to lower spin and increase speed.

cobra CONNECT
This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos Caddie app to receive a FREE 90-day trial that will track your on-course performance and provides in-depth strokes gained analysis. See app for details.

RADSPEED WOMEN'S HYBRID

The RADSPEED™ women's hybrid features front-biased internal RADIAL WEIGHTING and an external back weight to deliver low spin, high launch and forgiveness.

FRONT-BIASED RAD WEIGHTING
Two 6g internal front RAD weights (12g total) and a 7g back weight combine to deliver ultra low spin with high launch and forgiveness.

HOLLOW SPLIT RAILS
Hollow rails in the front create 70% more flex on the sole right behind the face for higher launch and more speed.

FORGED FACE
A forged insert is thinner and more flexible to create faster ball speeds and higher launch for greater stopping power into greens.

BAFFLER RAILS
Two Baffler® sole rails prevent digging and allow the club to glide effortlessly out of tight lies, thick rough, and even bunkers.

RAD SPEED WOMEN'S IRON

The RADSPEED™ women's irons represent a significant leap forward in golf innovation. A breakthrough in weighting technology is met with the first application of 3D printing in golf club design, setting the bar for performance and technology higher than ever before.

EXTREME HEEL AND TOE WEIGHTING
10g and 3g of mass is positioned on the toe and heel extremities to create the best combination of speed, low spin and stability for optimized performance.

TUNED RAD WEIGHTING
A 10g weight positioned low and in the toe area centers the CG and adds stability for more distance and forgiveness on off-center hits.

FORGED PWRSHELL FACE
A forged face insert is made of a thin 17-4 stainless steel, and is designed to increase flex both on the face and the sole for faster ball speed and higher launch.

3D PRINTED MEDALLION
3D printing offers unlimited complexity in design, allowing us to produce an intricate lattice medallion structure that saves weight and fine-tunes feel.

cobra CONNECT

T-RAIL WOMEN'S HYBRID-IRON

The next generation Cobra women's T-Rail hybrid irons feature all new Baffler Hollow Split Rails to deliver enhanced speed, launch, and distance to help you experience the easiest golf of your life.

HOLLOW CONSTRUCTION
A hollow design through the set delivers effortless launch and distance in the long irons to the wedges.

BAFFLER HOLLOW SPLIT RAILS
Hollow rails in the front create up to 70% more flex on the sole right behind the face to deliver high launch and more speed while maintaining excellent turf interaction from the signature Baffler rail design.

FORGED E9 FACE
A high strength steel face is designed with variable thickness E9 Technology to ensure no distance is left behind, even on off-center hits.

6 HYBRID IN THE SET
A 6-hybrid launches higher and is more forgiving than a 6-iron, making longer approach shots not just easier, but much more consistent.

JUNIOR'S

RADX SPEED B JUNIOR DRIVER

The RADSPEED™ XB Junior Driver features Radial Weighting Technology to deliver the fastest, longest and most forgiving drives. With purchase, Juniors get a FREE SHAFT UPGRADE available in varying lengths as they grow into their game.

BACK-BIASED RADIAL WEIGHTING
The RADSPEED™ XB driver features 20g positioned in the back (14g of fixed weight and a 6g interchangeable weight) to create our most forgiving RADSPEED model. An additional 8g of fixed weight is positioned in the front to lower spin for the longest and fastest ball flights.

THIN-PLY CARBON WRAP CROWN
The Carbon Wrap Crown system features a new carbon fiber material that is 30% thinner which creates another 6 grams of discretionary weight that can be repositioned to optimize performance.

T-BAR CHASSIS
A refined T-Bar Speed Chassis design is 7 grams lighter, giving us even more discretionary weight to position more mass low and back within the frame to optimize forgiveness.

CNC MILLED INFINITY FACE
An infinity edge face design expands the milled area by 95%, increasing the zone of maximum ball speed.

cobra CONNECT
This club is equipped with a COBRA CONNECT Smart Grip powered by Arccos Golf. Download the Arccos Caddie app to receive a FREE 90-day trial that will track your on-course performance and provides in-depth strokes gained analysis. See app for details.

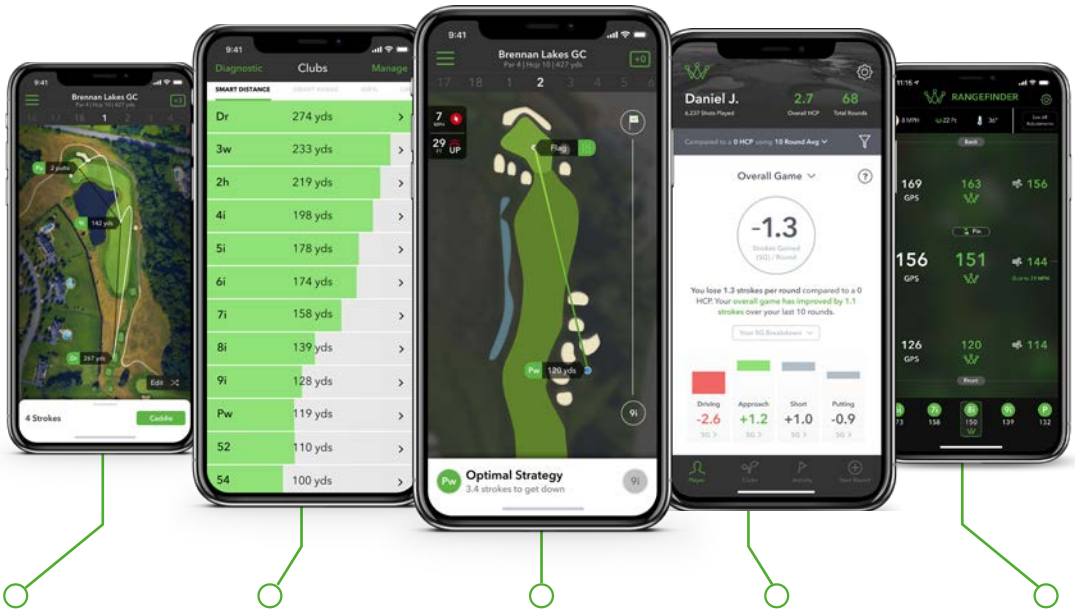
GOLF'S SMARTEST CLUBS

POWERED BY ARCCOS GOLF

CONNECT AND IMPROVE WITH GOLF'S FIRST A.I. CADDIE

Every club in the KING® family features an Arccos sensor seamlessly embedded in the grip. Pair them with the Arccos Caddie app to automatically record your on-course data, receive strokes gained analysis for your game and access Arccos Rangefinder GPS with "Plays Like" distances for over 40,000 courses! Developed with Microsoft, Arccos Caddie A.I. predicts your best strategy for every shot.

ARCCOS CADDIE APP FEATURES



Automatic Shot Tracking | **Smart Distance** | **A.I. Caddie Advice** | **Strokes Gained Analytics** | **Arccos Rangefinder**

ARCCOS CADDIE

Download on the App Store

GET IT ON Google Play

TRUE ARTIFICIAL INTELLIGENCE

Arccos Caddie A.I. leverages golf's richest data set to help players make smarter decisions and perform their best.

A.I. FUELED BY

- User's location on hole
- User's personal shot history
- Performance data from other Arccos Caddie users
- Wind speed/direction
- Other weather & geographic data
- Elevation changes
- Hole geometry
- Hazard locations

PHONE IN POCKET ALTERNATIVES

Two solutions for players who prefer not to carry a smartphone:

APPLE WATCH

Arccos Caddie allows COBRA CONNECT™ users to record their shot data using Apple Watch (Series 2 or newer).

ARCCOS LINK

This small, ultralight accessory clips to a user's belt or pocket to seamlessly record shot data. Compatible with iPhones and most Android devices.

FLY-XL MEN'S COMPLETE SET

The FLY-XL complete set includes a full bag of lightweight and forgiving clubs that deliver easy launch and distance.

ACCESSORIES

ULTRALIGHT

ULTRALIGHT STAND BAG is built for carrying at 4.5 lbs. Featuring eight pockets and a COOLFlow hip pad providing ultimate breathability and comfort. The EASYFlex base allows greater turf contact when legs are activated for advanced stability.

ULTRALIGHT CART BAG features a cart strap PASS-THROUGH allowing access to every pocket while keeping bag secure on cart. Designed with maximum storage including a large insulated cooler pocket, which holds twelve 12 ounce cans and dual fleece lined valuables pockets.

cobra RAD SPEED

TOUR CROWN STAND BAG, a collaboration with Cobra and Vessel, combines the look, feel, and durability of our Tour RADSPEED™ Staff bag. Strategically placed carbon fiber panels with carbon fiber legs provide maximum tour level performance. Now featuring a 4-point backpack strap, this bag is ready for walking the course.

ULTRADRY PRO

ULTRADRY PRO STAND BAG

The ULTRADRY Pro Stand Bag provides protection from the elements without sacrificing the ability to carry. At just 4.5 lbs, the ULTRADRY Pro Stand Bag is the lightest waterproof bag we've ever made.

ULTRADRY PRO CART BAG

The ULTRADRY Cart Bag is constructed to provide superior waterproof protection. The 14-way top with a putter well is paired with a cart strap PASS-THROUGH allowing access to every pocket while on the cart.
